October 2024

Dear Parents and Guardians,

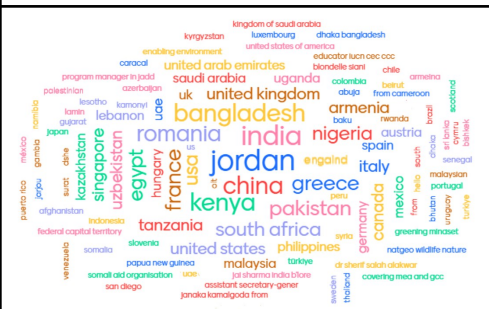

At Lower School, we believe that every child's educational journey is unique, and to support their growth, we continuously assess and observe our students throughout the academic year. This ongoing process allows us to understand their strengths, identify areas for improvement, and tailor our teaching methods to meet each child's individual needs.

For our younger groups, like Playgroup, Nursery and Reception we focus more on Formative Assessments. These are ongoing evaluations that occur during daily class activities, play sessions, and through regular feedback. Formative assessments help us monitor student progress and provide immediate support where needed. These assessments are often informal and include classroom observations, participation in discussions, social interactions, and learning through play. As students advance to higher grades, besides the ongoing Formative Assessments, Summative Assessments are introduced to measure their learning at the end of a unit or lesson. These assessments may include verbal or written tests, graded classwork/homework, and larger projects that assess students' comprehension of the topics covered. Summative assessments are important milestones that give us a clear picture of how well the students have mastered the curriculum content.

Both types of assessments play crucial roles in our educational approach. While Formative Assessments help us adjust our teaching strategies in real time, Summative Assessments provide a comprehensive overview of each student's academic achievements. We ensure that these assessments are conducted in a supportive and stress-free environment, to encourage a love for learning rather than a focus on grades. We look forward to your support and encourage you to reach out if you have any concerns about your child's progress.

Rasha Tariq.

UNESCO WEBINAR BY CGS

CGS recently co-hosted a UNESCO webinar as part of their Greening Education Partnership on the topic 'Integrating Digital Technologies to Enhance Climate Change Curricula.' There were 638 participants from the countries listed above.

CGS HOSTS FIRST CGSMUN

CGS hosted the first CGS Model United Nation, (CGSMUN) over the first weekend of September, pictured above. More details about the CGSMUN in the special supplement: <http://cgs.com.bd/cgsmun>

GRATITUDE DAY AT LOWER

21st September is World Gratitude Day and was introduced by Indian spiritual leader Sri Chinmoy in 1965 during a Thanksgiving dinner at the United Nations.

This day serves as an opportunity for us to reflect on this value and research shows a focus on gratitude can positively impact mental and physical health, reduce stress and increase happiness.

This year CGS has collaborated with Holy Trinity College in Trinidad to share our gratitude activities. A Lower School pair pictured above.

October 2024

Dear Parents and Students,

As we move into October, we are excited to announce two engaging and educational events that will enrich our students' learning experiences and provide valuable insights into important contemporary topics. Firstly, we will be hosting a Business Summit aimed at expanding our students' understanding of the dynamic world of business. This event is designed to expose them to real-world practices, foster entrepreneurial thinking, and inspire them with firsthand knowledge from industry professionals. We believe this summit will be a significant opportunity for our students to explore various business concepts and network with experts in the field, enhancing their career aspirations.

In addition, we will be holding a special Mufti Day focused on the theme of 'AI: Threats and Opportunities.' This event will allow students to dress up in costumes that illustrate their views on AI. They will get an opportunity to participate in detailed discussions about the impact of Artificial Intelligence on our lives and future. Through interactive activities, presentations, and thought-provoking discussions, students will gain a clearer understanding of both the potential benefits and challenges associated with AI technology, sparking their interest in this rapidly evolving field.

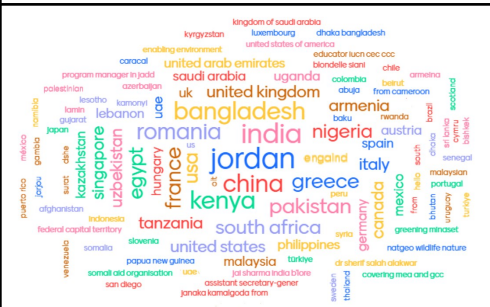

We encourage you to support these events by discussing them with your children and helping them prepare for these enriching experiences. Your involvement and enthusiasm contribute greatly to the success of these initiatives, and we look forward to the valuable learning and growth these events will undoubtedly bring to our students.

Thank you for your continued support.

Warm regards,

Faiza Chowdhury
